How satisfied are you about the quality of the content to learn during the course?

20 responses

How satisfied were you about the requirement to read the book at home?

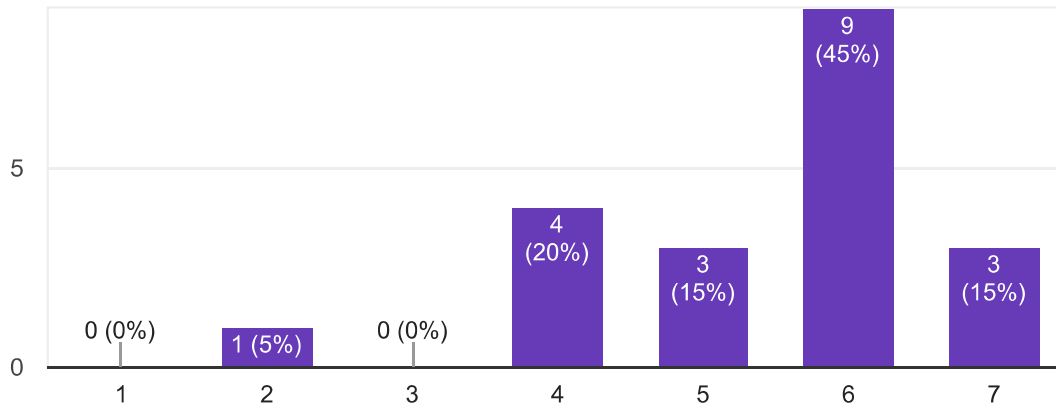

20 responses

How satisfied were you about being tested online before every course?

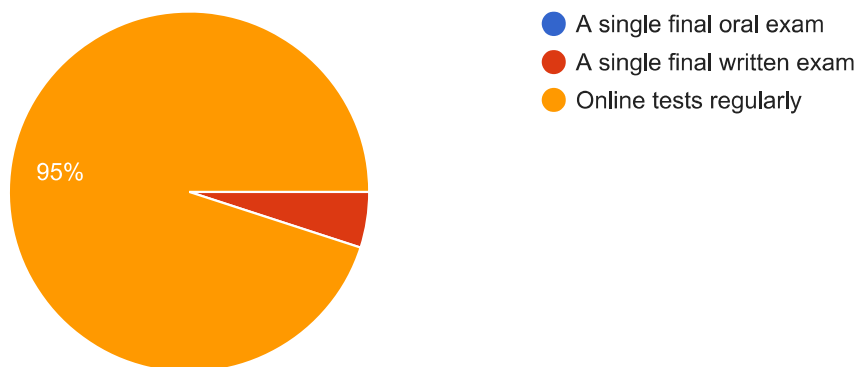

How satisfied were you about being tested online before every course?

20 responses

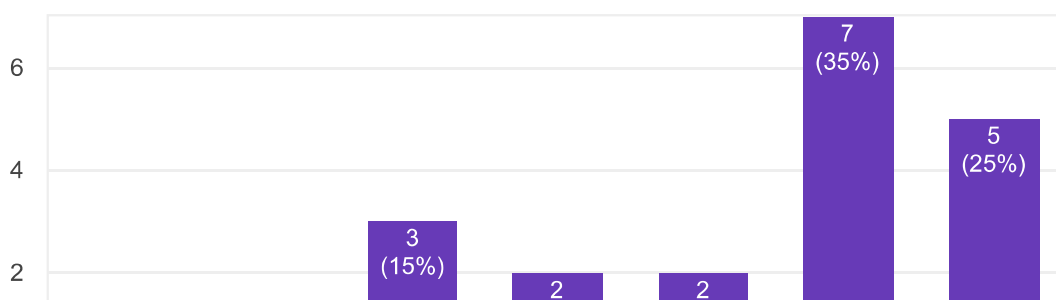

Do you prefer to have a single final exam or being tested online regularly?

20 responses

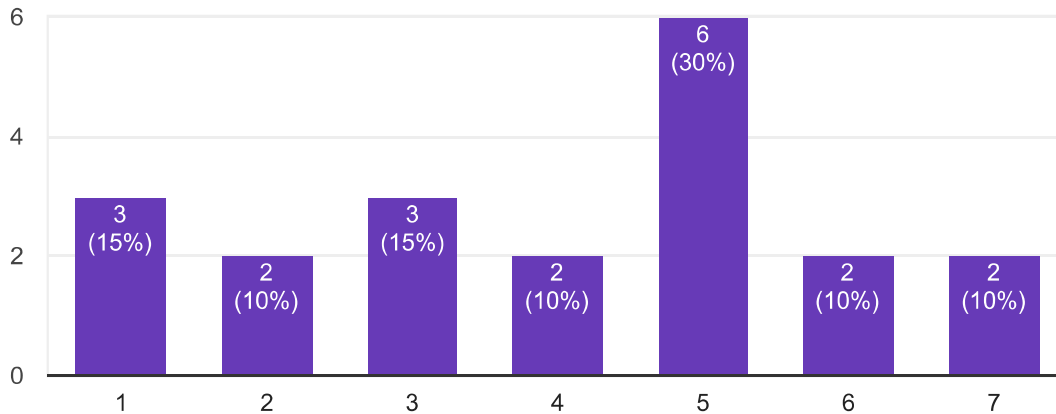

How satisfied were you about the requirement to present orally an article and invite to debate?

20 responses

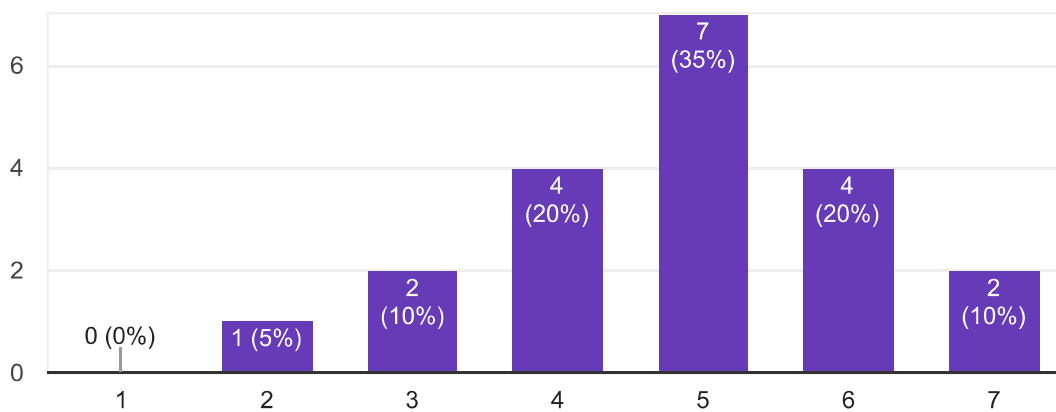

How satisfied were you about the requirement to participate by writing on the forum?

20 responses

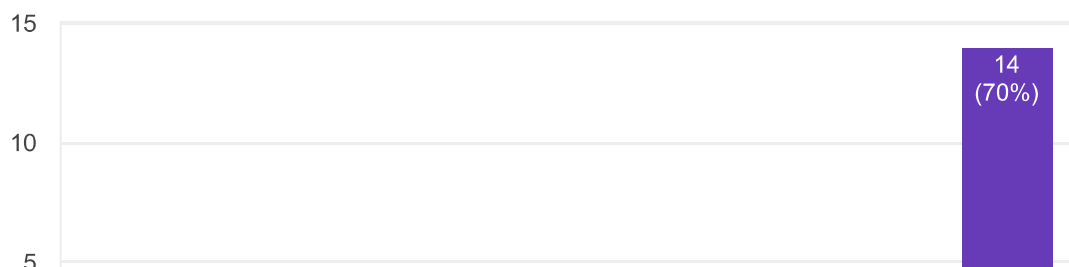

How satisfied were you about the encouragement to participate orally during the course?

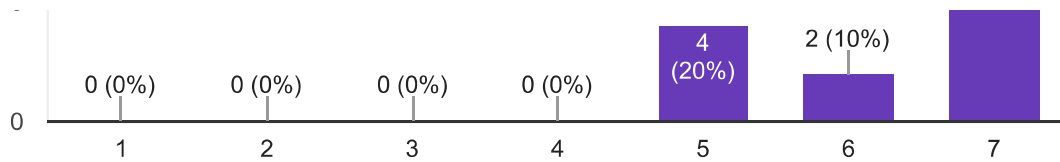

20 responses

How satisfied were you about the frequency of the course?

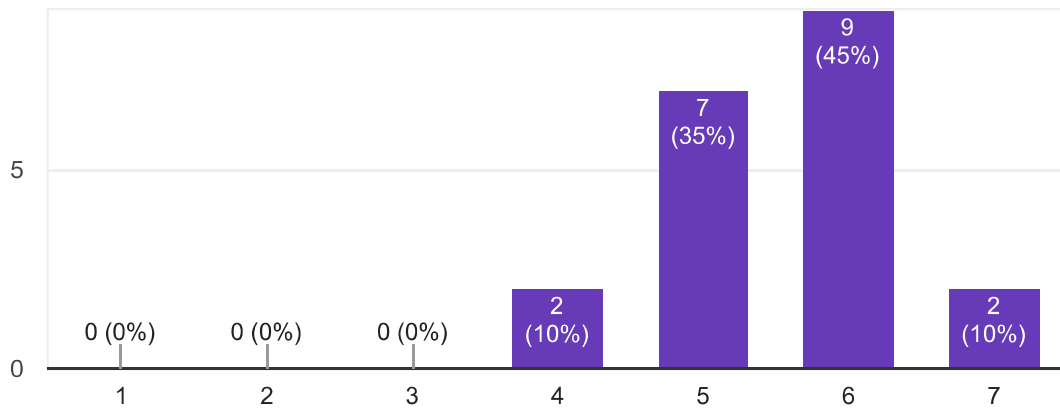

20 responses

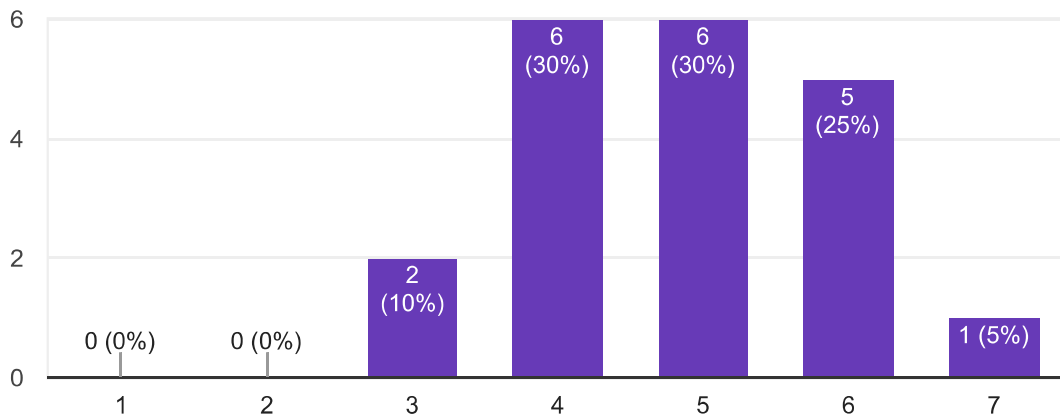

How satisfied were you about the overall structure/format of the course?

20 responses

What is the extent of learning you made thanks to this course?

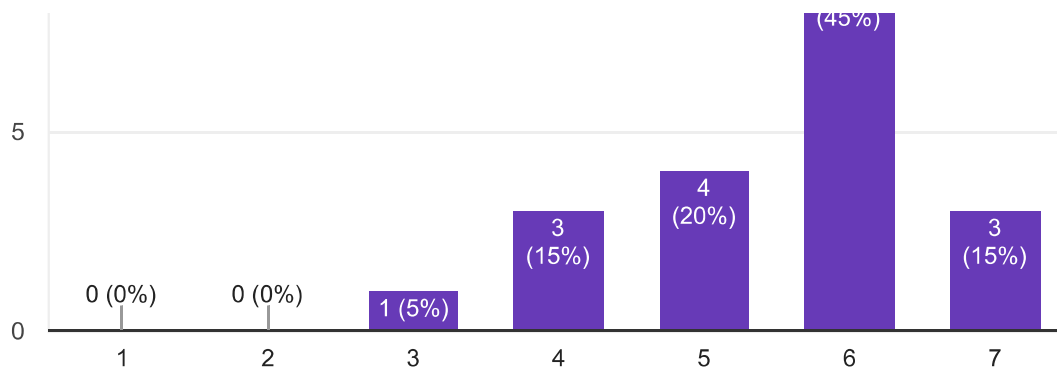

20 responses

Would you recommend the adopted structure/format of the course over more classical structures/formats of teaching?

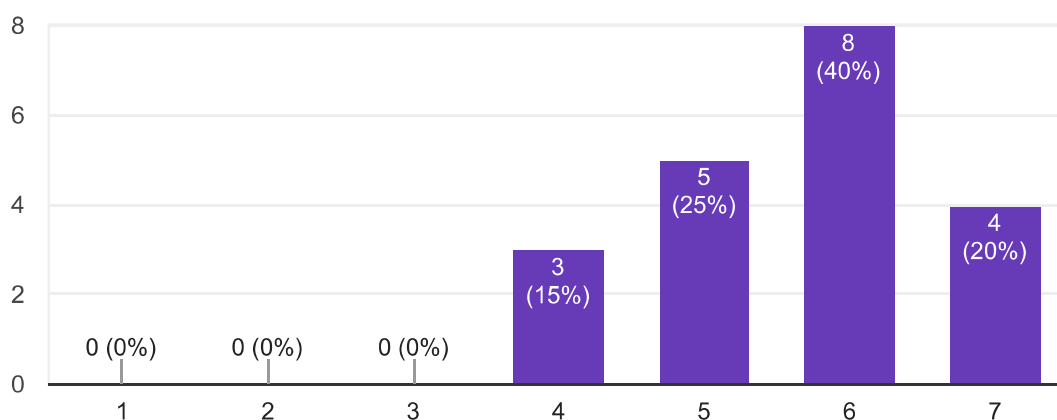

20 responses

How satisfied were you about the rating procedure and rating weights?

20 responses

Do you have any comments or suggestions to make?

8 responses

Online course: you never get to know the right answers = never know which of your answers were wrong.
No learning effect:(

Would be great if the right answers of the tests would appear in moodle after the deadline, so one can actually learn from ones mistakes!!

It would have been nice to spend a bit of time for going through the quizz questions, talking about passages and contents of the book that were hard to understand or to repeat the most important facts of the chapters together in the course. It would be easier to remember more "hard facts" that way. But all in all i really liked the course! Thanks a lot and best wishes!

I liked the multiple rating procedure a lot because I think there are possibilities for everyone to find his/her way to participate and contribute to the course and I also appreciated that the structure differed from usual seminars. Eventhough I didn't get that much output by only reading the book and answering the questions because even if I read the chapters consciously I couldn't answer the questions properly - that was just too much information to answer questions in such a detailed way and made feel demotivated. I also thought it was a really good idea to use the moodle platform and give people the chance to discuss things there (especially for those who don't want to speak in class) - for me it would've been better to be forced to post regularly and connected to the chapters (f.i. everyone has to post at least 50 words about a certain topic for each chapter. something that he/she found very interesting) - instead of an online test

Some people for each chapter, something that we also found very interesting, instead of an online test every 2/3 weeks.

But thanks a lot for your class, I enjoyed it very much!

Overall the structure of the course was very good. The only issue i had was with some of the questions in the quiz. Some of them were really confusing, and even if you had read the book it was quite difficult to find the correct answer(s).

Also, the fact that you are a very "relaxed" teacher makes it a lot more easy and fun to participate in class. I have the feeling that i learned a lot in this course!

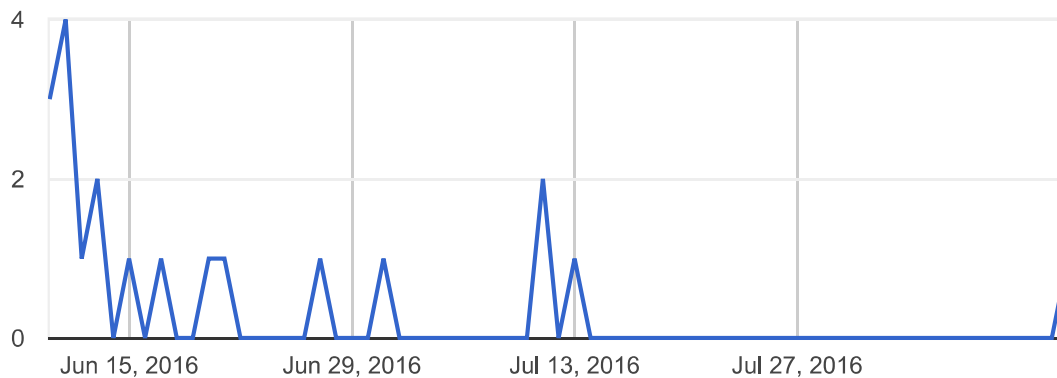

Keep up the good work!

Sometimes it was just too hard to follow all the different presentations. I'd recommend to reduce their extent and instead of it include a bit more of classical teaching, or even better, talking about your experiences and your work or whatever.

There is a danger of people learning less, because it depends on how much you involve yourself (taking part of discussions etc.), but I think it is how studing works and every one is responsible for his self

The courses were sometimes a little bit tiring because they were filled with the presentations. It is very difficult to listen to other students presenting for 3-5hours.
